Wipe the Blue Spots Away and Keep your Residents and Patients Safe Today!

¡Limpie las Manchas Azules y Mantenga a sus Residentes y Pacientes Seguros hoy!

Oczyść niebieskie plamki i zapewnij bezpieczeństwo swoim mieszkańcom i pacjentom!

1. Look for the Blue Spots when you are cleaning and disinfecting.
2. Blue Spots have been placed on surfaces that are touched many times every day.
3. The surfaces can have dangerous germs on them.
4. It is very important to clean and disinfect all of these surfaces every day, even if there are no blue spots.
5. Use a new cloth or new side of the cloth for each piece of furniture or equipment.
6. Clean and disinfect from cleanest to dirtiest and from top to bottom.
7. Good cleaning and disinfecting helps PROTECT residents and patients.
8. Thank you!

Clean and Disinfect ALL the surfaces with Blue Dots!

Remember to use a new cloth or folded side when you wipe a new object

Wipe the WHOLE Surface

ASK the residents and patients if you can move their items to clean and disinfect!
